Abstract:

SEO Stands for "Search Engine Optimization". Increase the website results via paid/natural resources. Search engine optimisation should not be seen as an end in itself. It is a function that should be undertaken to improve the overall commercial performance of a website. The role of SEO is to legitimately process of improving rankings. There are few genuine guarantees of a top placement, particularly for highly competitive search terms. Good SEO will improve a website’s ranking across a range of selected terms. However, any process whereby a search engine is illicitly manipulated in order to guarantee a high placement is referred to as spamming. The successful execution of a search engine optimisation project requires skills in the areas of analysis, research, planning, copy writing and communication.

A comprehensive search engine optimisation project is divided into four interrelated phases.
1. Pre-site activities — The research and planning activities undertaken before an existing or new site or page is actually touched or built.
2. On-site activities — The activities directly involved in the content and design of webpages.
3. Off-site activities — Building a portfolio of quality inbound links to your website.
4. Post-site activities — Analysing and responding to site traffic and user feedback once a website has been optimised. Effective SEO is a continuous activity.

Keywords: SEO; PPC; Metatags; Alttags
